searching

for the homo sapiens

[download in pdf](#)

in search for the homo sapiens

that there are many homo sapiens in this universe

of course I know and

we humans always remember

that is why we always are homo sapiens

being by principle wise

solve each problem continuously

that is why we know very well

what the effects of our doings

on the ... our future

and therefore know

that we never be zombies

of a tyranny ... of any individual

being a mass of delusion

that would be our end !

so I think I am

and I can be like that ...

because all homo sapiens

on our worlds

can also be

all just a matter of intelligence

of this foresight

for millions of years in advance
our individual independence
so to be free for real freedom

but here on this planet of zombies
I am sure they are all just addicted
who rush from one harm to the other
always looking > for more harm

because of all this harm
of course ... these > their world will end
and all these billions talk about their success !

from harming with your successful crowd !
so from this mass of carelessness destruction
who never remember > so no homo sapiens
since they are only a product of their mass
So the total alienation from themselves
incited from

a Satanic Delusion Broadcasting
therefore seeking only from this harm
a human could not heal them
because they are in this billion crowd
of deplorable slaves
united enslaved !

who harm themselves continuously
competitively distract each other
from this regrettable
harmful behavior

keeping themselves constantly down

harming endlessly

that is why they are still up at night
always with all these billions of lanterns on
to illuminate their settlements

having to race around
from one conversation to the next
until they are falling asleep
in front of the television

so this delusion
from the big work avalanche
they all have to bury themselves
otherwise she would see the light

so

"we are slaves to ourselves"

so do not pamper yourself
from this stupor delusion sense
where is someone with his car
driving to the fitness center !

redeem ...

where is someone with the cigarette !
to drinking the rotten water !
to produce
so where is the mass of delusions
competing ?
about destruction

but these poor are mistaken
have to abolish constantly
to not notice

that they are not important at all
not allowed to notice anything real

only on her fata morgana
so on this glistening water in front
that is not there > that they can never reach
until the dead relieve them ... holding them tight

they only create damage!
every one of these billions
can only hurt
must hurt

so that is why it is a law
for all those years not any thing accomplished
only this unfortunate enslave state
it wanted > what he naturally did not want
for that he is too regrettable

therefore no human rights are guaranteed
but nobody can change that at all

who then ?

which unfortunate

would just listen to his regrettable insanity ?

which regrettable ?

would report about his regret ?

which regrettable ?

any body

which TV station ?

would turn off ?
its diversion

which regrettable

would investigations start against ?

what unfortunate country ?

would want to change something ?

would you want to see ?

that all regrettable ?

himself too !

what a regrettable pharisee

and his all colleagues

would admit ?

that you are the problem ?

and not a Jesus Christ

which unfortunate infallible

would a giordano bruno ?

to praise ... a galileo ?

what a regrettable president

to condemn ?

and these ghosts chanting

to pose as heroes ?

how could anyone ?

a single one of these billions ?

to understand his regrettable existence ?

if there are billions of these regrettable !

no other task

how everyone tears into their marsh !

if all your selection

only his > regret

pushing everyone around the world ?

"everyone must be regrettable!"

"there must be no human dignity!"

these all addicts

not even able

to start a dialogue

so initiate a development !
but only all of them wrap up

that is why they all
so put under supervision
like a drug addict > himself
being a pity to everyone around
they all !
so entangled in her drug addiction
with her drug baron

and as logistically in this situation
in this mass not making possible
they have to be disposed of at one time

since those being a danger
to our whole universe
that they would destroy
so we let them do this

[galactic foundation](#)

these anti people

so help everyone
and harm everyone

so these masses are people's prey attitude
by not offering anything else
only drugs ...

So now a cigarette
then the philip moris will be happy

now a little beer
then you are friend of the beer brewer

now watch the vulture around radio
then you are at the best probaganda

of the universe

now rave about a red wine
then the winemaker will be happy

eat a pig now
then the mass animal owner can
sell more pig feeds

repair a TV now
then these gladiators can play games
be considered

and these perfect enslavements

still a
liberal democratic basic order
call !

which kgb agent could keep up with that ?
because of course the climate tipping rights
the climate already can't !

or rave about the predators
So people's contempt
in perfection !

can there be a rescue?
with all these fata morgana

the last with power
this dilution
want to reach
have to

this capitalism
of this capital crime
this perfect slavery

this Republic

is a human rights state !

there are state probaganda financing rights!

state forcing labor rights !

pharma drugs> get sick rights !

chimney sweep > a break in rights !

predator animal licensing rights !

dying agent selling rights !

dr mengel slaughtering rights !

free rider rights !

climate tilting rights !

so guarantee all these worlds destruction rights

because this is not a fundamental right state> thus unconstitutional

So this program

so this

"liberal democratic basic order"

this federal office for constitutional elimination

so the end victory of the leader over all intelligent life

on this world

I do not just know

not a single other person

no people having worthy goals

so this could appreciate in principle

so how do I appreciate these ?

but I see over all only pests

like a wander swarm of locusts

they throw everything in their insustaning
destroy their own livelihoods
in their parasitic delusion

who want to achieve nothing ... can ... may
only people to death torment in their delusion of great happiness
because yes of a predator guarded pest
no one can want something
that is just too stupid

epilogue

So what is the solution ?
of course to guarantee the basic rights
that there can be a sociable society
to shape a future in the situation
to do the probaganda
for a dignified world
not for this decadent one
world destuction
